Outcomes

Average Doctor Online Booking Growth Since Onboarding

Their online system is the most user friendly and efficient I have ever used anywhere.
- patient at Kensington Medical Clinic

Benefits reported from Clinic owners

- ✓ Easier retention and recruiting of Doctors and Staff.
- ✓ Increased profit margin (reduced overhead, faster growth).
- ✓ Ability to grow practices for new doctors rapidly.
- ✓ Precise, customizable scheduling and booking.
- ✓ Better Google Review ratings.
- ✓ Accurate demographic info for patient safety.

Case Study

How Cortico helped Kensington Medical Clinic **eliminate** daily appointment phone calls.

Kensington Medical Clinic (KMC) is a family and specialist practice in Burnaby, BC. When you visit KMC, the first thing you notice is how quiet it is, despite serving hundreds of patients daily. Patients are calm, and are served right away.

Patients were now able to book their appointments directly online, avoiding the need to phone in to schedule a time with a specific doctor. As a result, KMC is realizing over **\$3,300 per month** in administrative savings.

Cortico's software package also enhanced KMC's online presence, increasing visibility of the clinic to capture new patients. As a result, KMC saw a **31% booking increase** in the month of May 2021 compared to August 2020.

Before Cortico, we had over **800 phone calls every day** from patients booking or rescheduling an appointment. After Cortico, we have **zero** phone calls.

Their online system is the most user friendly and efficient I have ever used anywhere. And all their doctors are pretty good to boot. I have no hesitation about seeing any of them.

Love that you can book online, choose your pharmacy for prescriptions, choose doctor and time, and even whether you want to have a telehealth video or phone call! This is fantastic and I wish more clinics and dr. offices worked this way. I always get to choose what is best for me, and that is wonderful. Love going here, as I can never even get through on the phone to my ACTUAL doctor. Thank you, Kensington Medical Clinic, for making things easy for patients!

I've been going here for the past couple of years and I have always loved the service. Especially Dr.Kurra, she's very kind and caring and she knows what is best for me. She is truly an amazing doctor and it feels really good knowing that I have a doctor I can trust and feel safe around !

It's also super easy to book walk in appointments, and you don't have to wait as long.

Thank you for your amazing service even during a pandemic!

Easy online booking! We've been here twice for my 5 y.o. Both doctors (not pediatricians) were patient and very friendly to my daughter. Both handled our issues professionally. As for the receptionists, our first visit was abit confusing ...

Kensington Medical Clinic deserves 5 stars just for it's online appointment system. Why other clinics don't invest in an online system and waste \$\$\$ on rude incompetent admins is a mystery to me.

- + appointment was super easy to make online
- + Can track your place in the queue so you don't have to wait in the clinic with all the other sick patients (this is great if you have babies/kids/pregnant women)
- + Nurses were helpful and quick to respond when I was there asking questions
- + The doctor was calm and gentle with my son, she also took my concerns seriously. We took our son in on his third day of fever, showing no other symptoms yet - but I told her our sons history of ear infection and she told us what to do if it flares up or if fever doesn't die down.
- + Lots of parking, inside a plaza
- + relatively clean compared to other walk ins in Burnaby that we have been to.

Overall, if you need a walk-in clinic fast, this is a place to go!

We've used this clinic since 2008. I have been pleased with the quality of care and the online booking system means that I rarely wait for appointments. Five stars!
