What you get with Tali?

With **AI Scribe**, you can have a natural conversation with your patient while Tali records, extracts key details, and generates a structured clinical note, eliminating hours of manual documentation. **Medical Dictation** transcribes notes directly into your EHR three times faster than typing, using advanced speech recognition and medical language models. **Medical Search** provides instant, evidence-based answers from trusted sources like Merck Manuals and OpenFDA, while the **EHR Assistant** lets you use your voice to create reminders and open forms hands-free. Plus, our dedicated support team is here to ensure you get the most out of Tali.

Why trust Tali with your notes?

Tali is the trusted AI Scribe for real-world clinical use, selected for the Ontario Medical Association Pilot and ranked the #2 AI Scribe by the U.S. Department of Veterans Affairs.

Tali AI is SOC 2 Type 2 certified and fully compliant with PHIPA and PIPEDA. Our AI dictation and drug monograph search are safeguarded by advanced security layers, including firewalls and real-time monitoring to prevent unauthorized access.

Your privacy is our priority.

Time saved

Creating over **6 million** notes.

Summarizing over **4 million** visits.

Giving back **22 years** and counting!

What do our current users think?

*"Game changer! Has allowed me to be **more attentive to the patient** as well as not miss things in my notes. Excellent with accents as well. Note taking **no longer the dread of my day**"*

Dr. Davies

*"Having tried a few, Tali is the **most intuitive**. On top of saving time, I feel **way less exhausted** by the end of the day. Highly recommended."*

Dr. Levesque

*"I have to say it is life-changing... Since I have used it I have **saved at least on an average three hours** of documentation each day. **Tali AI is a lifesaver.**"*
